

A better way to reprocess devices:

*It starts with
better information.*

The right solution. The right approach.

Presenting Full Circle Reprocessing.

Healthcare facilities, more than ever, are reliant on information. We all know that.

That's why we've built our entire company around not only reprocessing your devices safely and effectively, but providing you the information you need — at every step of the way.

From the moment your devices arrive at MEDISISS for reprocessing, to the moment they are shipped back to you, we provide detailed, real-time, actionable information you need.

We call this Full Circle Reprocessing, and it's our proprietary way of doing business that sets us apart. It's why our customers choose MEDISISS, and it's why they stay with us.

Why Reprocess?

Financial Benefits: With reimbursements decreasing and healthcare costs increasing, it makes more sense than ever to reprocess. The substantial savings to be achieved can be re-invested to enhance patient care.

Environmental Contributions: Reprocessing prevents thousands of tons of medical waste from going directly to landfills.

Safety and Reliability: Our Device Certification Program ensures our devices are subjected to greater scrutiny and inspection than new ones... meeting if not exceeding the well-documented safety levels required by the FDA.

We don't just reprocess devices. We help you process information.

Every MEDISISS customer benefits from OnDemand, our online management system:

- **Track your orders — with 24/7, real-time access, from receipt at MEDISISS to return delivery — full circle.**
- **Manage reprocessing POs and invoices.**
- **Monitor and analyze savings, calculated monthly or annually, by facility, by device... however you want and whenever you need the data.**
- **Obtain complete analysis of reclamation rates and new financial opportunities.**
- **Respond to any regulatory survey or inspection, with our industry-unique Accreditation Compliance Package – every document you need right at your fingertips.**

Complementing the value of OnDemand, our account team works alongside your staff members to identify and capture additional savings for your facility.

Exclusively from MEDISISS.

Full Circle Reprocessing means:

- We guarantee you'll receive your own devices back.
- You'll know the status of your orders at all times.
- You'll know what you're getting back and precisely when, enhancing your ability to manage your device inventory.
- Your devices will undergo the stringent quality-driven steps that comprise our Device Certification Program.
- We have the highest device reclamation rates in the industry.
- We offer the fastest device turnaround time.
- We're exclusively focused on reprocessing – that's what we do and we do it the best.

We never forget: Our reputation rests on every device.

"We were initially quite skeptical about reprocessing. We visited the plant and we were thoroughly impressed with the philosophy, vision and leadership of the company... We are currently reprocessing and have made a seamless transition to this financially beneficial and environmentally responsible approach ..."

— OR Manager
Sterile Processing Coordinator; Scrub Tech
California

"MEDISISS places exceptional emphasis on quality...they stand behind their products and are always interested to improve their service."

— Sr. Vice President of Operations / Certified AAAHC Inspector
Ambulatory Surgical Centers of America

"The bottom line is that I can't tell any difference between a new device and the reprocessed device from MEDISISS...it saves us a ton of money and is environmentally responsible."

— Orthopedic Surgeon
Oregon

"In an effort to evaluate whether the MEDISISS reprocessed CTR blades are as sharp as those provided directly from the original manufacturer, we conducted a 30-day randomized blind study with our surgeons. Much to our surprise, our surgeons could not tell if they were using a new or reprocessed CTR blade. Even today they truly cannot tell the difference. "

— Director of Nursing
Maryland

Devices we reprocess:

Orthopedic	Gastrointestinal
Ablation Wands	Hot and Cold Biopsy Forceps
Arthroscopic Shavers, Abraders and Burs	Eye
Carpal Tunnel Release Blades	Phaco Tips
